Relevant Experiences

Frontend Web Developer @ GHI+

(Dec 2023 - Jan 2025)

- Developing a React-based business portal for Green Home Improvements Plus (GHI+) to streamline operations and enhance customer experience.

- Utilizing Material UI for a user-friendly interface and efficient data visualization.

- Integrating MongoDB to manage customer data securely and efficiently.

- Implementing APIs to facilitate seamless data exchange between the portal and external systems.

- Building a comprehensive Multi-Level Marketing (MLM) functionality, enabling lead generation, customer management, and real-time tracking.

- Empowering GHI+ to deliver exceptional customer service, transparent pricing, and high-quality hurricane protection and solar systems to South Florida homeowners.

Frontend / Wordpress Developer @ Wozinga Pty.Ltd.

(Jun 2021 - Nov 2023)

- Designed and developed compelling landing pages using Figma for UI/UX prototyping, WordPress for content management, and ParcelJS for front-end development.

- Translated design concepts from Figma into high-quality, visually appealing, and functional landing pages using WordPress and ParcelJS.

- Built and implemented landing pages that prioritize user experience (UX) and visual design, leveraging Figma for UI/UX prototyping, with WordPress and ParcelJS.

- Operating within an agile environment, I participated in weekly stand-ups and actively engaged in two hours of sprint planning and sprint retrospectives every week.

Frontend Web Developer @ Accelerated Digital Delivery

(Jan - May 2021)

- Developed a dynamic single-page web application (SPA) using Angular, marking my first project using the Angular framework.

- Contributed to the front-end development of the website utilizing Angular and Bootstrap.

- Focused on crafting user interfaces that balanced aesthetics with functionality, ensuring a positive user experience.
